

OAKLEY

SPRING 2013

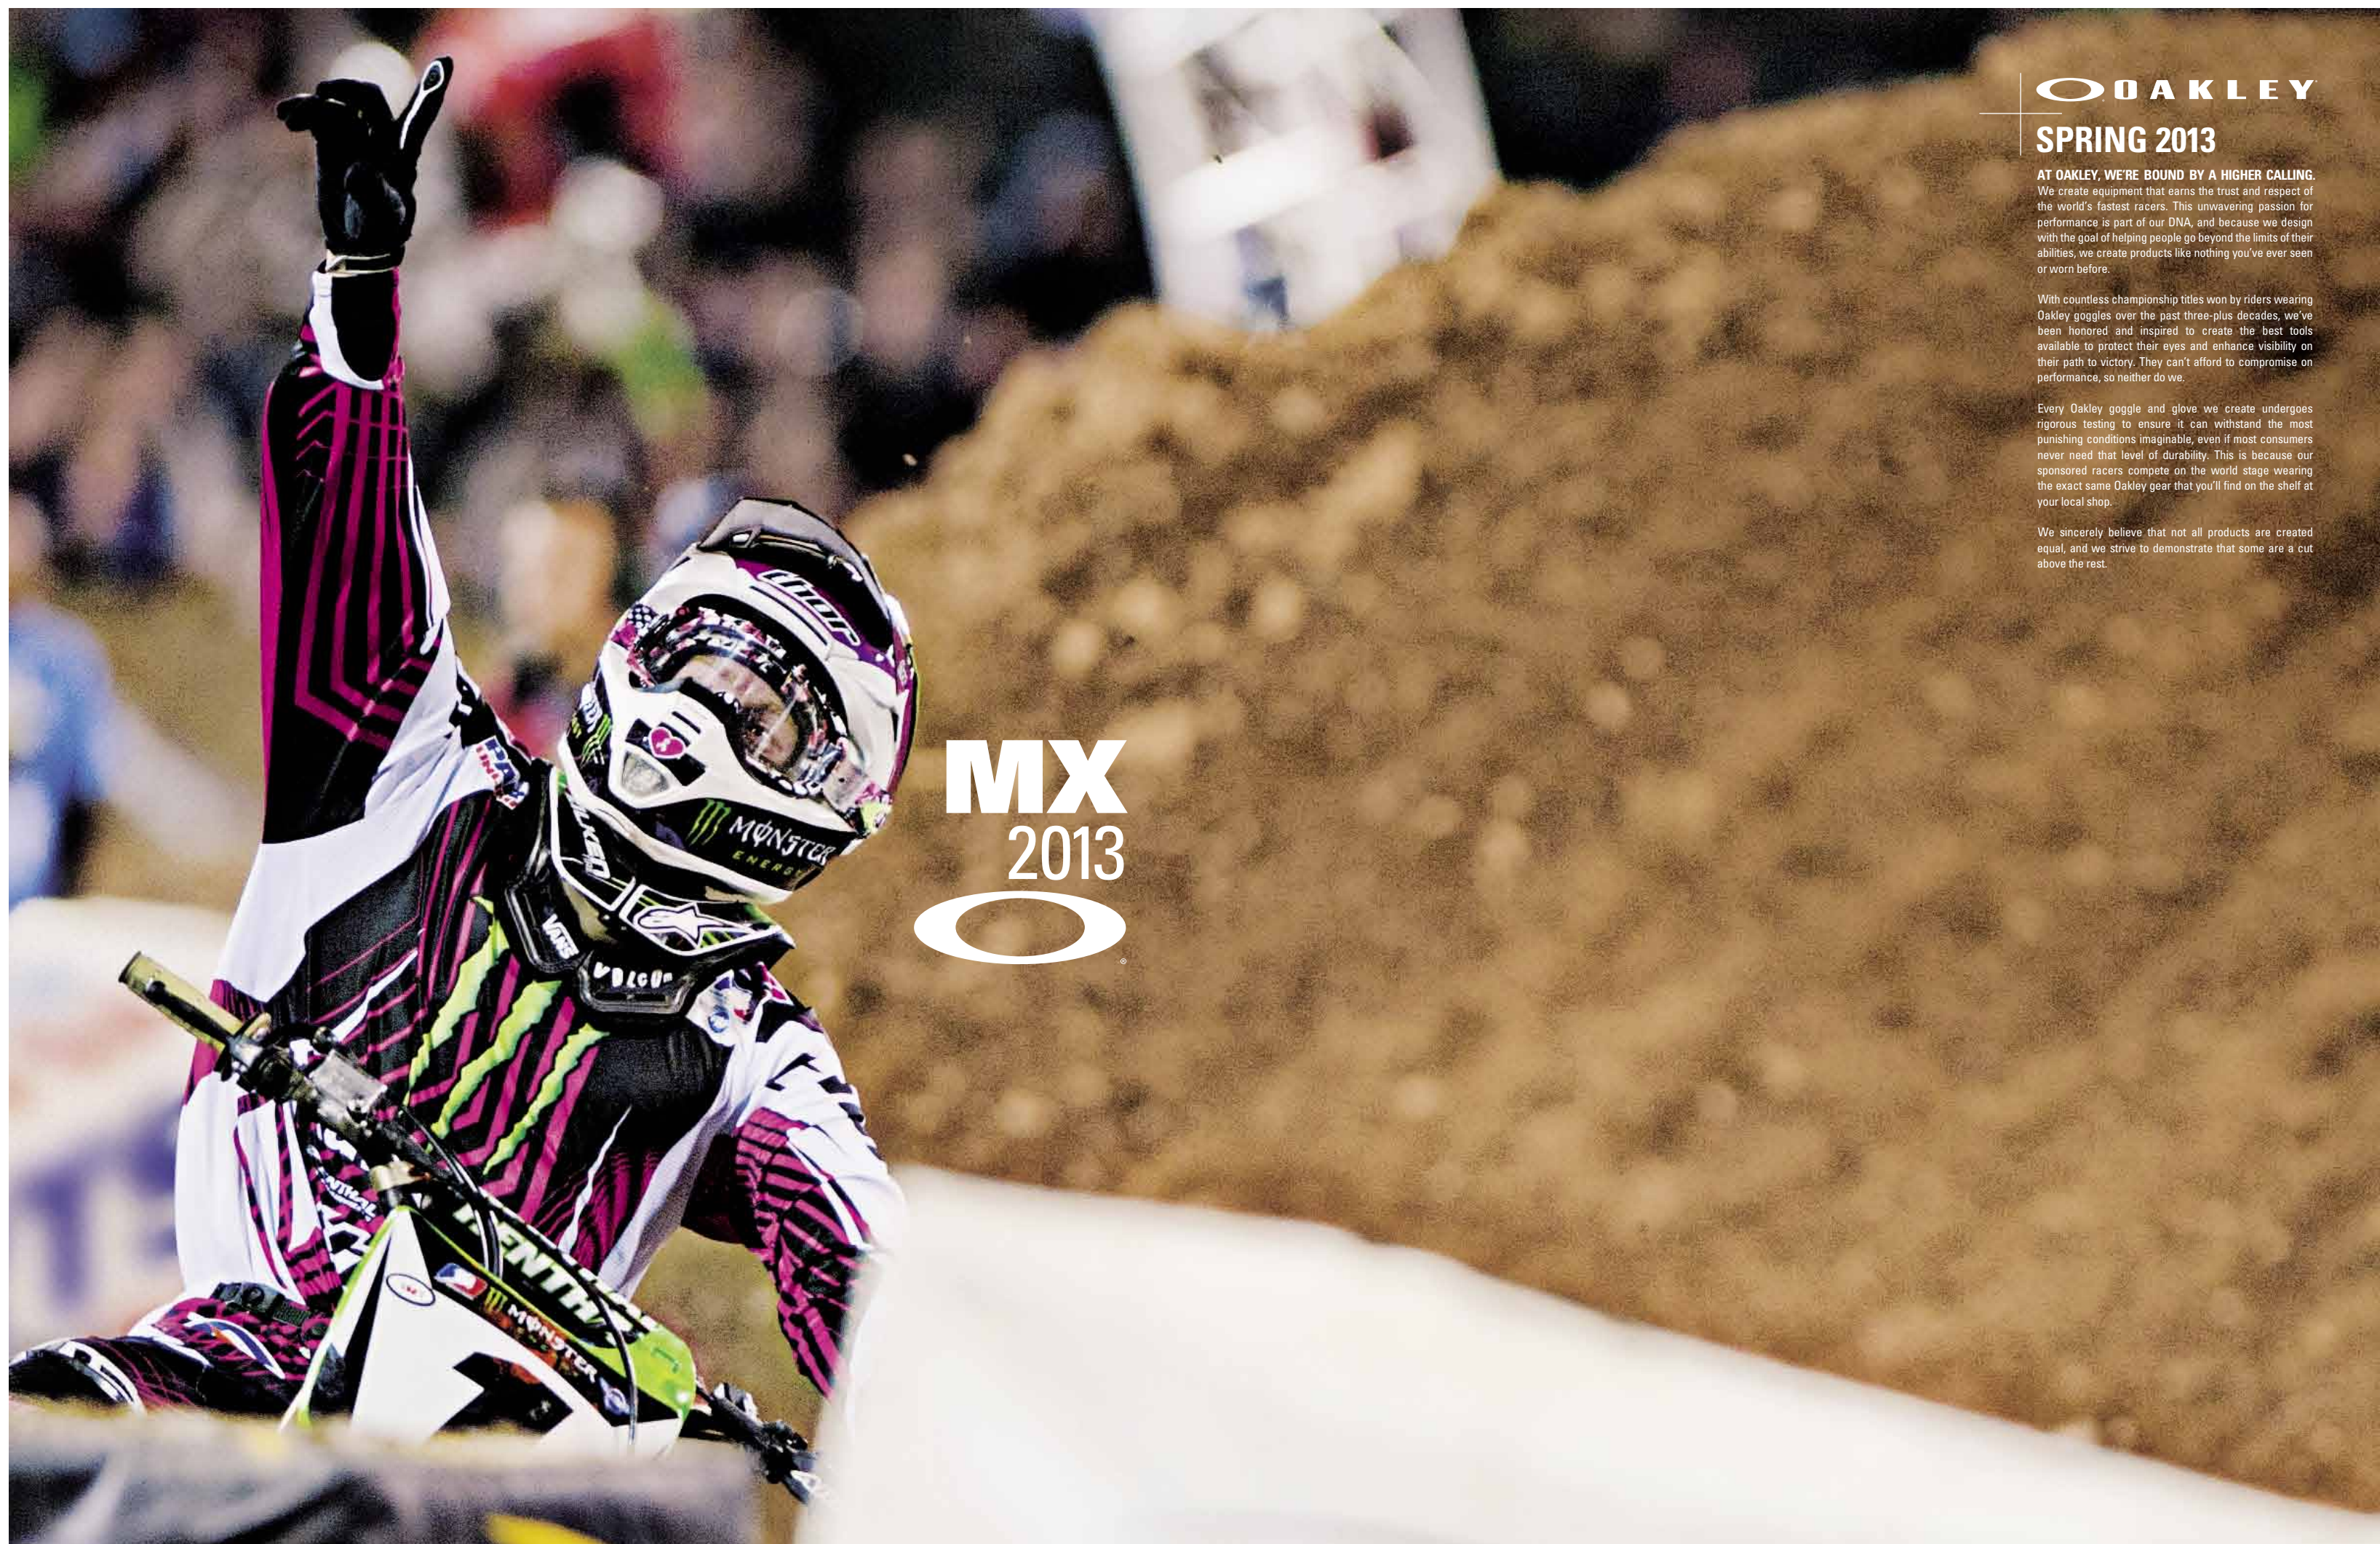

AT OAKLEY, WE'RE BOUND BY A HIGHER CALLING.

We create equipment that earns the trust and respect of the world's fastest racers. This unwavering passion for performance is part of our DNA, and because we design with the goal of helping people go beyond the limits of their abilities, we create products like nothing you've ever seen or worn before.

With countless championship titles won by riders wearing Oakley goggles over the past three-plus decades, we've been honored and inspired to create the best tools available to protect their eyes and enhance visibility on their path to victory. They can't afford to compromise on performance, so neither do we.

Every Oakley goggle and glove we create undergoes rigorous testing to ensure it can withstand the most punishing conditions imaginable, even if most consumers never need that level of durability. This is because our sponsored racers compete on the world stage wearing the exact same Oakley gear that you'll find on the shelf at your local shop.

We sincerely believe that not all products are created equal, and we strive to demonstrate that some are a cut above the rest.

## JAMES STEWART

### SIGNATURE SERIES MAYHEM™

James Stewart didn't earn his titles by limiting his challenges. He did it by challenging his limits. The Oakley Mayhem™ goggle lets him do it with the focus of premium clarity and the best comfort and fit of any goggle we've ever made. This Signature Series edition honors the decorated champion with unique styling.

**OAKLEY**

## RYAN VILLOPOTO

### SIGNATURE SERIES CROWBAR®

Ryan Villopoto is always on the hunt for a title shot, and back-to-back Supercross Championships means RV is a five-star general in his class. His Signature Series Crowbar® goggle taunts the competition with a steel grey bull's-eye target wrapped around the frame and strap. His bio includes guns, guts and glory, and our Crowbar® goggle arms him with everything he needs to keep performance locked and loaded.

**OAKLEY**

## RYAN DUNGEY

### SIGNATURE SERIES CROWBAR®

Talk to rider Ryan Dungey about danger and he'll tell you the only risk is not putting everything you've got into being the best. That's why his goggle of choice is the Oakley Crowbar.® This Signature Series edition salutes his dedication while giving him a wide peripheral view with the razor-sharp clarity that helped him see his way to both the 2010 Supercross Championship and the 2010 Motocross Championship, making him the first rookie in history to win both the premier Supercross and National Motocross titles in his inaugural season.

**OAKLEY**  
**TROY LEE DESIGNS**

**MX GOGGLE COLLECTION**  
 The fuel of pro racers is a high octane mix of adrenaline and attitude, and they've been getting it from Troy Lee Designs® (TLD) for three decades. TLD is the premier custom paint shop for racing helmets and the MX industry leader in cutting-edge colors and graphics. We joined forces with Troy and his cadre of visionaries to create a special collection of customized creations. The driving force behind these design rarities was the idea of fusing the best of art and innovation, and putting it in the hands of those who have what it takes to rise in the ranks of riders. Think of the art as the battle paint of warriors, and the performance as a weapon to wield.

## RICKY CARMICHAEL

**SIGNATURE SERIES PROVEN®**  
RC joined the Oakley family in 1983 and eventually became the winningest rider in Motorcross history. He did it by demanding the best from himself and from his equipment, and designs like Proven® answer that demand. This Signature Series edition has the comfort and performance a living legend can respect.

## HERITAGE COLLECTION

Oakley's legacy in motocross began more than three decades ago, and our roots run deeper than any other MX goggle brand out there. That heritage is being honored by one of the most iconic collections in MX goggle history. The Heritage Series includes legendary designs like Pro Frame® and O Frame® rendered in original color combinations from the very first Oakley MX goggle, along with our latest models featuring classic-inspired graphics and colors with technology that redefines the standards of performance, function and fit. The Factory Pilot logo salutes elite riders who have relied on Oakley innovation to rack up countless MX and SX victories in a legacy of domination.

Heritage strap wrap included with this collection.

GOGGLE TECHNOLOGY

IMPACT PROTECTION

**CHICKS DIG SCARS.** They don't dig that hole in your face where your eye used to be. Oakley MX goggles utilize an optically pure Lexan® lens to maintain impact protection that meets ANSI Z87.1 and EN 1838 standards for inspired confidence. Let the dirt, rocks and debris be someone else's problem and keep your eyes where they should be: Focused on the checkered flag.

FIT/COMFORT

**FORGET ABOUT THAT GOGGLE ON YOUR FACE.** Developed with 3-D CAD/CAM engineering for a true anatomical fit, Oakley MX goggles are designed to offer the highest level of comfort and performance. Contoured frame architecture provides a continuous seal against dust and debris while eliminating pressure points and hot spots. They're so comfortable that you'll forget they're there.

SWEAT MANAGEMENT

**DON'T SWEAT IT.** Like a mop for your forehead, our ultra-plush faceplate foam utilizes triple-layer construction that literally sucks sweat right off your face to keep your eye sockets clear and cool. Soft, comfortable fleece draws liquid away from the skin and into the dual-density foam where capillary action moves moisture to the perimeter for quick evaporation.

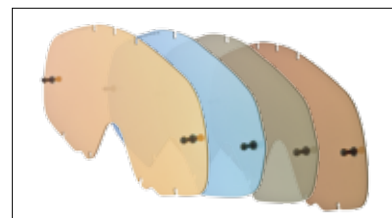

ANTI-FOG

**MAINTAIN CLARITY IN THE HEAT OF BATTLE.** All Oakley MX Goggles utilize our f2 anti-fog coating to absorb moisture and eliminate haze when the action gets hot and humid. Frame vents are carefully engineered to provide optimized airflow that keeps your eyes cool and comfortable, without causing tearing from excessive wind at high speeds.

FRAME COMPOSITION

**IT'S WHAT'S INSIDE THAT COUNTS.** The polymers in our thermoplastic urethane goggle chassis are formulated for high durability and controlled flexibility for improved safety during impact, as well as maintaining resistance to UV radiation, humidity, thermal shock and chemical exposure. Mayhem™ and Crowbar® models feature rigid O Matter™ outrigger strap attachments that provide further enhancements in comfort and security.

LENS TINTS

**ENHANCED VISIBILITY IN ANY LIGHT CONDITION.** Oakley lens tints are engineered to offer the best combination of light filtering, color balance and visual contrast. Choose from a variety of lens colors that optimize performance in blazing sunshine or under the stadium lights, and everything in between. Optional Iridium® coatings use superheated metallic oxides that are fused to the lens at the molecular level, permanently bonding to create a uniform filtering layer that boosts contrast and cuts glare even further.

GOGGLE LENSES/TINTS

Customize any MX goggle with your choice of lens color and choose the best optics for your environment. Made of optically pure Lexan® to maintain durable impact resistance and 100% UV filtering, these single lens options come with anti-fog treatment and include Iridium® lens coating to precisely tune the transmission of light.
