## JAMES STEWART SIGNATURE SERIES MAYHEM™

James Stewart didn't earn his titles by limiting his challenges. He did it by challenging his limits. The Oakley Mayhem goggle lets him do it with the focus of premium clarity and the best comfort and fit of any goggle ever made. This Signature Series edition honors the decorated champion with unique styling.

**JS JET BLACK**  
Clear & Dark Grey Lenses (01-855)

**JS WHITE**  
Clear & Dark Grey Lenses (01-826)

JAMES STEWART

## MIKE METZGER SIGNATURE SERIES MAYHEM™

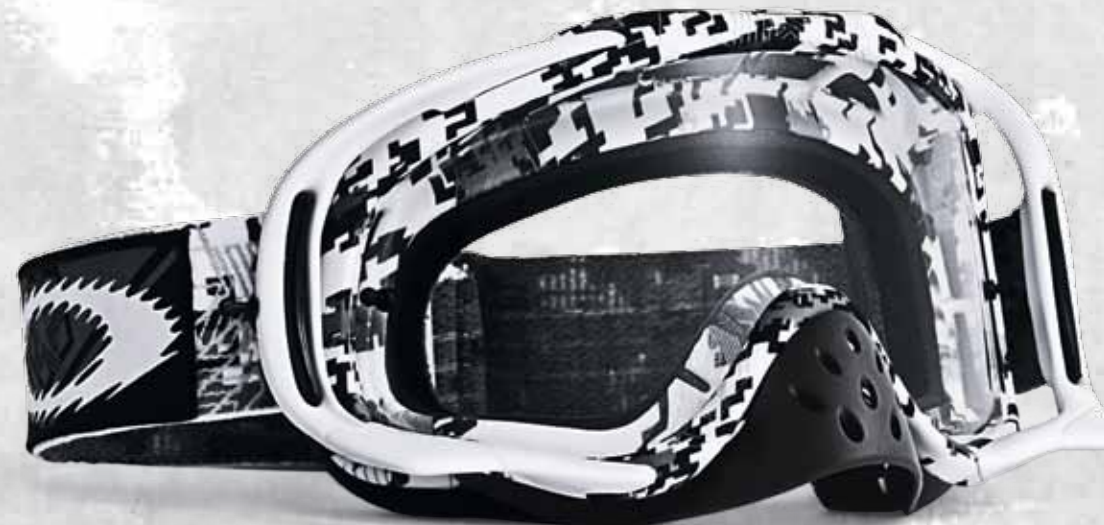

Before you call the Godfather of Freestyle Motocross a madman, take a look at his goggle. This Signature Series edition of Oakley Mayhem honors the ultimate FMX innovator with some choice innovations of its own, including premium optics and the best comfort and fit of any MX goggle ever made.

**SPARK'D**  
Clear & Dark Grey Lenses (01-765)

## RYAN VILLOPOTO SIGNATURE SERIES CROWBAR®

Ryan Villopoto is always on the hunt for a title shot, and he's a five-star general in his class. That's what inspired the Digi-Camo graphics and military highlights on his Signature Series Crowbar.® It's a premium design with EN 1938 rated impact protection, a true anatomical fit with moisture-wicking foam, and all the attitude a two-wheeled warrior needs.

**DIGI-CAMO**  
Clear Lens (01-735)

## RYAN DUNGEY SIGNATURE SERIES CROWBAR®

Talk to rider Ryan Dungey about danger and he'll tell you the only risk is not putting everything you've got into being the best. That's why his goggle of choice is the Oakley Crowbar. This Signature Series edition salutes his dedication while giving him a wide peripheral view with razor-sharp clarity that helped him see his way to the 2010 Supercross Championship.

**BAR CODE**

## RICKY CARMICHAEL SIGNATURE SERIES PROVEN®

RC joined the Oakley family in 1983 and eventually became the winningest rider in history. He did it by demanding the best from himself and from his equipment, and designs like Proven answer that demand. This Signature Series edition has the comfort and performance a living legend can respect.

**LEGENDARY RED FADE**

## GOGGLE LENSES / TINTS

Customize any MX goggle with your choice of lens color and choose the best optics for your environment. Made of optically pure Lexan® to maintain durable impact resistance and 100% UV filtering, these single lens options come with anti-fog treatment and include Iridium® lens coating to precisely tune the transmission of light.

## GOGGLE TECHNOLOGY

### HIGH DEFINITION OPTICS®

High Definition Optics®: Available only from Oakley, HDO® offers unbeatable performance and protection. ANSI measures optical performance by analyzing prismatic power, prismatic imbalance, refractive power, lens astigmatism and pattern definition. Oakley utilizes proprietary technologies like XYZ Optics® to surpass these tests. HDO® also includes Oakley's 100% UV filtering, as well as impact protection worthy of sports professionals.

### IMPACT RESISTANCE

When Oakley designs goggles, protection is at the forefront. The most stringent impact testing is called ANSI Z87.1. The High Velocity test uses a 1/4" stainless steel ball traveling at 102 mph. The High Mass test uses a 500-gram conical tipped missile dropped from a height of 50 inches.

### FIT / COMFORT

Developed with 3-D CAD/CAM engineering for a true anatomical fit, Oakley MX goggles are designed to offer the highest level of comfort and performance. Contoured frame architecture provides a continuous seal against dust and debris while allowing moisture to wick away from the skin. All Oakley MX goggles take advantage of triple-density fleece foam for optimized comfort and maximum sweat absorption.

### ANTI-FOG

All Oakley MX goggles use the company's proprietary F2 anti-fog coating to eliminate haze in the heat of competition. Snowcross and Enduro goggles feature the added benefit of dual-vented lenses to create a thermal barrier between you and the elements, in addition to the enhanced performance of Oakley's exclusive F3 anti-fog technology which can absorb a minimum of 2 ml of water.

### FRAME COMPOSITION

Engineering breakthroughs in structural materials allow Oakley to produce lightweight, high-performance goggle frames that maintain superior protection and comfort. The polymers in O Matter® goggle chassis are formulated for high durability and controlled flexibility for improved safety during impact, as well as maintaining resistance to ultraviolet radiation, humidity, thermal shock and chemical exposure.

### IRIDIUM® LENS COATINGS

Oakley Iridium lens coatings allow the wearer to tune transmission for any light condition. Superheated metallic oxides are fused to the lens at the molecular level, permanently bonding to create a uniform filtering layer that optimizes contrast and minimizes glare. The coatings are specifically formulated to reduce glare and increase contrast while improving depth perception in a wide variety of light conditions.
